

Schell et al. Vol. 119, No. 5, December 1992. Pages 1173–1183.

Due to an author's error, the last row of gel bands in Fig. 2 *B* was upside down and backwards. The time course for pulse-labeled polymeric IgA receptor (*pIgAR*) as it moved through B, the highly enriched Golgi fraction, was depicted running right to left. The error was not made in the quantitative analysis, i.e., the results derived from the densitometry of this data are correct in the original article. A corrected Fig. 2 *B* appears below.
