M. E. MacDonald, T. W. Mak, and A. Bernstein. Erythroleukemia induction by replication-competent type C viruses cloned from the anemia- and polycythemia-inducing isolates of Friend leukemia virus. **151**:1493, No. 6, June 1980.

*Page 1496, legend to Fig. 1.* The legend to Fig. 1 should read: Spleen touch preparations from BALB/c mice injected as newborns with F-MuLV<sub>A</sub> and F-MuLV<sub>P</sub>. BALB/c mice were injected intraperitoneally at 1 d of age with (A) 0.1 ml of filtered culture fluid from uninfected NIH/3T3 fibroblast cells, (B)  $5 \times 10^5$  PFU of F-MuLV<sub>A</sub>, or (C)  $5 \times 10^5$  PFU of F-MuLV<sub>P</sub>. Spleens were taken 45 d after incubation for the preparation of touch prints.
