

# JEM Advisory Editorial Board: Increasing diversity

Carl Nathan,<sup>1</sup> Michel C. Nussenzweig,<sup>1</sup> and Teodoro Pulvirenti<sup>2</sup>

<sup>1</sup>Editorial Board Co-Chairs and <sup>2</sup>Executive Editor, *The Journal of Experimental Medicine*

*The Journal of Experimental Medicine* (JEM) Advisory Editorial Board includes over 100 prominent scientists. To ensure that the Advisory Editorial Board covers the diversity of research fields served by the journal, offers the next generation of researchers an opportunity to participate, and improves in gender balance, we welcome to the Board the experts listed below.

Adding new voices and doubling the number of women on the Board are steps in a process that will continue in the years ahead.

We thank the former Advisory Editorial Board members for their invaluable contributions and for remaining members of the JEM community.

List of new Advisory Editors with their institutions

New Advisory Editor name	Institution
Akiko Iwasaki	Yale University, New Haven, CT
Asrar Malik	University of Illinois at Chicago, College of Medicine, Chicago, IL
Bertie Gottgens	Cambridge Institute for Medical Research, Cambridge, England, UK
